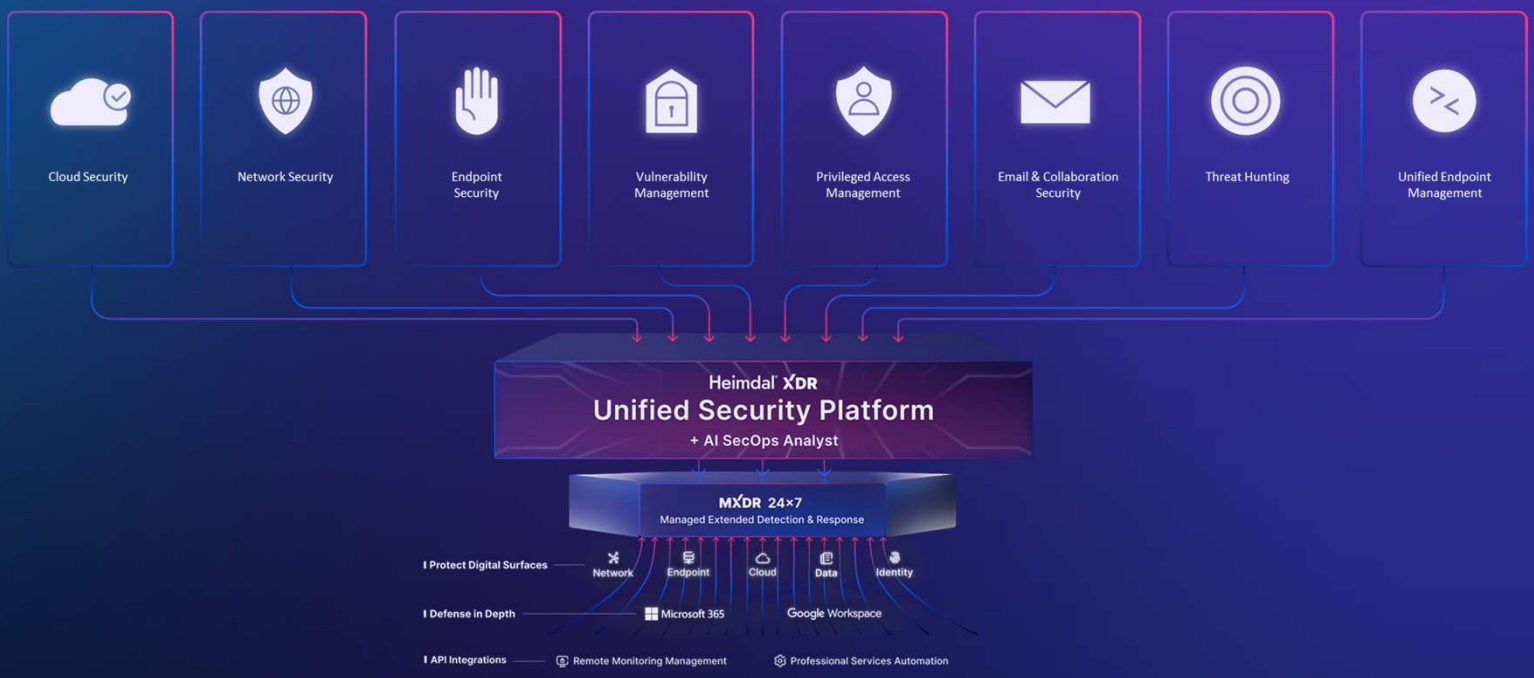
Heimdal®

License Guide



General Licensing:

Modules covered:

- ✓ DNS Security Endpoint
- ✓ Patch & Asset Management
- ✓ Infinity Management
- ✓ Next-Gen Antivirus
- ✓ Ransomware Encryption Protection
- ✓ Privilege Elevation & Delegation Management
- ✓ Application Control
- ✓ Threat-hunting & Action Center
- ✓ MXDR/SOC

Following rules apply:

- ❖ 1 License covers 1 Active Endpoint
- ❖ An Active Endpoint is defined as a Device with the Heimdal Agent installed and corresponding module Licensing activated in the Heimdal Admin Dashboard.
- ❖ A license can be transferred to a new device when needed
- ❖ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period
- ❖ License count is calculated based on usage within the last 30 days

Module Specific Licensing:

Modules covered:

- ✓ DNS Security Network
- ✓ Privileged Account & Session Management
- ✓ E-mail Protection 365
- ✓ E-mail Protection ATP
- ✓ Remote Desktop.

Following rules apply:

- ❖ See individual module guidance below
- ❖ License count is calculated based on usage within the last 30 days

*This guide is made to clarify how each Heimdal Module is licensed as outlined in the EULA. Any updates or changes to the EULA will overrule this guide at any time. The current EULA can be found here: License Agreement - Heimdal

General Licensing:

DNS Security - Endpoint

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and *DNS Security Endpoint* Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Patch & Asset Management

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and *Patch & Asset Management* Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Infinity Management

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and Infinity Management Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Next-Gen Antivirus, Firewall & XTP

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and Next-Gen Antivirus Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Ransomware Encryption Protection

- ✓ 1 License covers 1 Active Endpoint and/or 1 Active Azure AD User
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and Ransomware Encryption Management Licensing activated in the Heimdal Admin Dashboard.
- ✓ An Active Azure AD User is defined as a user account in the Azure AD that is setup to be protected by the Ransomware Encryption Protection in the Heimdal Dashboard
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints or Active Azure AD User within the calculated period, whichever number is higher.

Privilege Elevation & Delegation Management [PEDM]

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and Privilege Elevation and Delegation Management Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

General Licensing:

Application Control

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and Application Control Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Threat Hunting & Action Center

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and TAC UI & M365 User Security Licensing activated in the Heimdal Admin Dashboard.
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

MXDR/SOC

- ✓ 1 License covers 1 Active Endpoint
- ✓ An Active Endpoint is defined as a Device with the Heimdal Agent installed and MXDR Licensing activated in the Heimdal Admin Dashboard.
- ✓ 1 License will cover 24/7 Managed SOC Services across all active Heimdal modules
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Module Specific Licensing:

DNS Security Network

- ✓ 1 License covers 1 Active Device on the network
- ✓ An Active Device is defined as a Device that is connected to the internet through the protected network (ex. Laptops, mobile phones, work & private devices, printers
- ✓ A license can be transferred to a new device when needed
- ✓ License requirements are calculated on the total number of simultaneous Active Endpoints within the calculated period

Privileged Account & Session Management [PASM]

- ✓ 1 License includes 1 Admin User & 10 End User
- ✓ An Admin User is defined as the user that have access to the PASM Admin Dashboard, and the ability to create new connections.
- ✓ An End User is defined as the users that have access to the PASM Platform and use the connections created by the Admin.
- ✓ License requirements are calculated on the total number of concurrent Admin Users or End Users within the calculated period. The user count that requires the highest license amount will be used.
    - Ex. A: 1 Admin User & 30 End Users will require 3 PASM Licenses
    - Ex. B: 4 Admin Users and 20 End Users will require 4 PASM Licenses
    - Ex. C: 3 Admin Users and 9 End Users will require 3 PASM licenses

E-Mail Protection 365

- ✓ 1 License covers 1 Active Email Sending Account
- ✓ License is not limited to Device or User count.
- ✓ Number of Active Email Sending Accounts is collected from MX Records or API integration
- ✓ License requirements are calculated on the total number of simultaneous Active Email Sending Account within the calculated period
- ✓ An Active E-mail Sending Account, is defined as any unique E-mail address sending more than 5 e-mails a month or with an Azure AD user associated

E-Mail Protection ATP

- ✓ 1 License covers 1 Active E-mail sending account
- ✓ License is not limited to Device or User count.
- ✓ Number of Active Email Sending Accounts is collected from MX Records or API integration
- ✓ License requirements are calculated on the total number of simultaneous Active E-mail Sending Account within the calculated period
- ✓ An Active E-mail Sending Account, is defined as any unique E-mail address sending more than 5 e-mails a month or with an Azure AD user associated

Remote Desktop

- ✓ 1 License includes 1 concurrent Session, 10 Supporter Accounts & 500 Devices
- ✓ Concurrent Sessions is defined as multiple active connections made from one device to another either at the same time or overlapping. Each license covers 1 active connection at any given time. Multiple connections made at the same time is calculated as Concurrent Sessions
- ✓ A Supporter Account is defined as a user that have access to the Heimdal Admin Dashboard, and the ability to establish new remote connections to the Devices.
- ✓ A Device is defined as an endpoint/server with the Heimdal Agent installed and Remote Desktop Licensing activated in the Heimdal Admin Dashboard.
- ✓ License requirements are calculated on the total number of Concurrent Sessions, Supporter Accounts or Devices within the calculated period. The count that requires the highest license amount will be used.
    - Ex. A: 1 Concurrent Session, 20 Supporter User & 300 Devices requires 2 RD Licenses.
    - Ex. B: 3 Concurrent Session, 7 Supporter User & 200 Devices requires 3 RD Licenses.
    - Ex. C: 2 Concurrent Session, 10 Supporter User & 1500 Devices requires 3 RD Licenses.
